SHAPING YOUR SECTION

SPECIAL COLD ROLLED
 STEEL SECTIONS

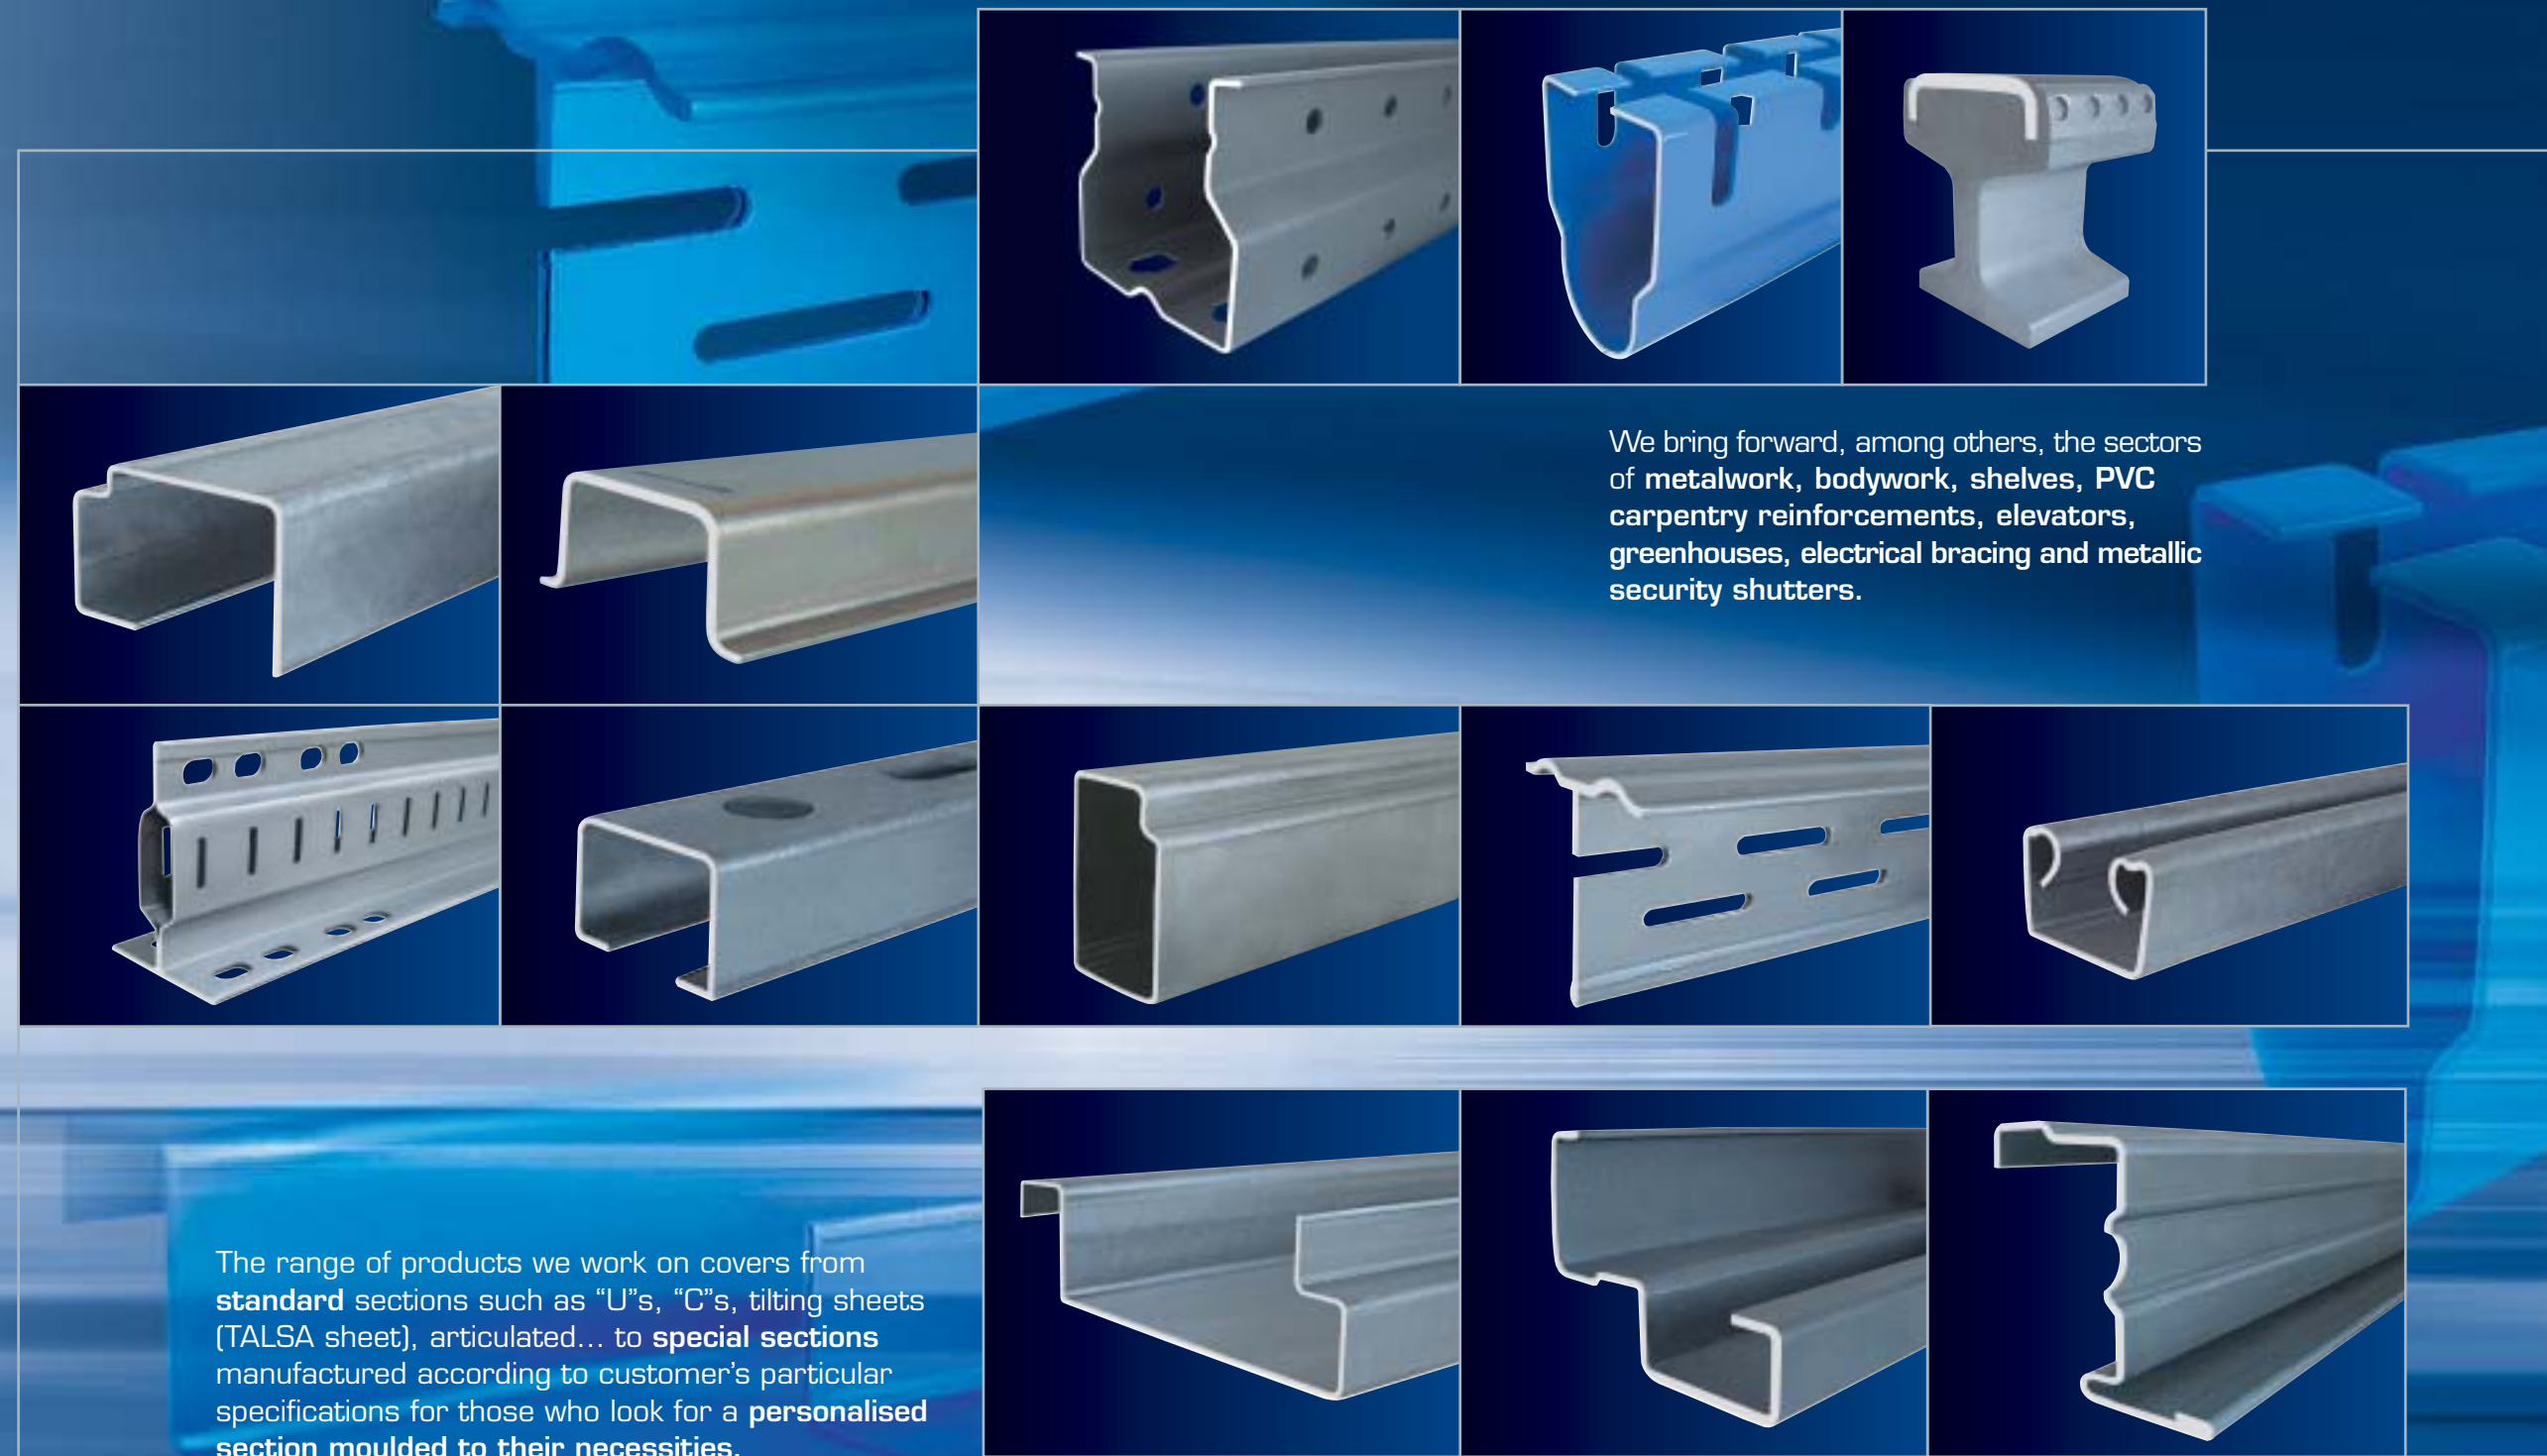

SHAPING YOUR SECTION

Since its founding in 1940, **TALLERES DE LA SALVE, S.A.** has been dedicated to the manufacturing of cold rolled steel sections.

From our facilities at Zarátamo (Vizcaya) and Miranda de Ebro (Burgos), featuring up to date rolling lines and punching and tailored cut systems, we serve our customers from the European Union and Latin America, offering them a high quality service.

Both our facilities hold the **ISO 9001:2000 Certification** and thus continue the commitment of being one of the leading companies in the field of cold rolled steel section manufacturing. All these efforts are put so as to guarantee the highest possible degree of satisfaction for our customers.

We bring forward, among others, the sectors of **metalwork, bodywork, shelves, PVC carpentry reinforcements, elevators, greenhouses, electrical bracing and metallic security shutters.**

The range of products we work on covers from **standard** sections such as "U"s, "C"s, tilting sheets (TALSA sheet), articulated... to **special sections** manufactured according to customer's particular specifications for those who look for a **personalised section moulded to their necessities.**
